ABOUT ME

Passionate Developer offering more than 4 years of experience in extensive backend development and some frontend development with added experience in Advertising. Highly dedicated and multilingual, playing with new and exciting tools, eager to learn and explore cutting-edge technologies. Looking forward to thrilling opportunities to broaden my horizon of technical skills!

WORK EXPERIENCE

SOFTWARE DEVELOPER | JUL 2020 - PRESENT

IMONEY GROUP, KUALA LUMPUR

- Developing Calculator functionalities for Personal Loan service.
- Integrating Feature Toggles for Home Loan service.
- Creating a backend serverless API that queries data using S3 Select
- Stacks & Tools: VueJS | NodeJS | AWS | Lambda | S3 | Django | GoCD | Serverless | S3 Select | NPM | Bitbucket

SOFTWARE DEVELOPER | JUL 2017 - JUL 2020

REA GROUP, KUALA LUMPUR

- Building Restful APIs with CRUD operations
- Optimizing REST APIs to handle maximum requests
- Load Testing the API requests and responses
- Building micro-services to call multiple endpoints and mapping all responses to a single standard with APIs
- Building APIs with AWS Lambda and deploying through serverless framework
- Writing Schemas in GraphQL and integrating services to pass requests
- Integrating collective services and different features with GraphQL using TypeScript
- Building multiple factories and services for customised Google API to be mapped to Regional Web and Mobile Apps
- Configuring and caching for API Gateway endpoints
- Developing new features on Frontend side using ReactJS
- Building pipeline for deployment in Buildkite
- Stacks & Tools - Typescript | NodeJS | ReactJS | AWS | RDS | Lambda | Buildkite | Serverless | GraphQL | MySQL | Github

SOFTWARE ENGINEER | MAY 2016 - JUN 2017

IFLIX, KUALA LUMPUR

- Creating new micro-services from the scratch
- Creating API endpoints with express framework
- Creating new libraries for node module and publishing in npm
- Building pipeline in buildkite for services deployment
- Deploying services through serverless framework
- Creating Lambda functions and publishing in AWS
- Developing web application using HTML, CSS, and JavaScript
- Stacks & Tools - Javascript | NodeJS | AWS | Buildkite | Serverless | Docker | MongoDB | ES6 | NPM | Yarn | Github

EDUCATION

BACHELOR OF SCIENCE | 2016

ABERTAY UNIVERSITY, DUNDEE, UK

- Dual Degree from Segi University, Malaysia
- Bachelors in Information Technology
- Major in Software Engineering
- First Class Honors with Disctinction
- Ranked in Top 5% of class
- 3 times Dean's List Award Recipient
- FYP on eCommerce dynamic website
- Course Highlights:

Web Project | Web Services | System Design | Software Architecture | Database System | Advanced Database System | Object-Oriented Programming | Advanced Programming | Windows Programming | Programming for Mobile Devices | Rapid Development Tools | Alternative Programming Approaches | Project Management | Commercial Applications | Information System Security

EXTRA-CURRICULAR ACTIVITIES

| SEP 2013 - DEC 2016

SEGI UNIVERSITY

Director of International Affairs, Student Representative Council | Student Representative, School of Information Technology | President, Segi Technology Club | President, Segi Photography Club

HOBBIES

Singer, Guitarist, Photographer, Program Host (Emcee), Painter, Voice Artist, Reader, Volunteer
